

Weekly Report - Week 6 (12.12)

Team Progress Summary

1. Integrated Testing

- Successfully tested agents interacting across multiple clusters (e.g., ethnicity and political views).
- Documented response patterns to identify gaps in prompt coverage.

2. Prompt Optimization

- Simplified complex prompts for economic agents to improve response rates.

Challenges Encountered

- Scaling issues when running concurrent agent tests.
- Some prompts resulted in repetitive or overly generic responses.

Next Steps

- Focus on scaling tests for larger group interactions.
- Finalize prompts and clustering for all groups before Christmas break.
- Do the presentation next week.
